

Futures Team Visioning Workshops

- Represent teachers, administrators, students, parents, community businesses and social institutions
- Represent a critical constituency

Are you:

- Able to think about the future
- Able to think creatively about education, educational delivery, and community
- Knowledgeable about local programs, services, and lifestyles
- Able to relate local issues to a global context
- Willing to do something different if well reasoned
- Able to bring balance of experience and thought to the Futures Team
- Able to speak well in public about the work of the Futures Team
- Willing and able to undertake homework assignments, prepare documentation, and report out to Futures Team
- Able to work well with others in intensive, challenging workshops
- Able to think in the best interest of the whole, not just personal self interest

With the need to build a new school comes the opportunity to focus on the long term future of the school institution: to evaluate it and improve its effectiveness and appropriateness.

“The school building design should anticipate future educational changes, and set the platform for improved teaching and learning, improved community connections, and long term operational efficiency.” Dr. Frank Locker

Join us for a three day workshop with Dr. Frank Locker, architect and educational consultant.

Become an integral part of the “Futures Team,” and work on the educational visioning, planning, and specifications that will lead us to an innovative design for the new

Hanover High School.

The visioning process concentrates on educational programs and the issues that define the nature of school. It is this process that will ultimately establish the building design.

Visioning examines a number of issues:

- 21st Century high schools: trends and role models.
- What works at Hanover HS? What doesn't work?
- Alignment of educational delivery with best practices.
- Evaluation of current programs and services.
- Impact of technology on role of teachers and students.
- What makes school desired by students?
- What defines success for students? For the school?
- Most effective methods of instruction.

Futures Team Workshops

Send completed form by mail or email to:
Patti Berry (pberry@hanoverschools.org)
188 Broadway • Hanover, MA • 02339
