# Extend School Year (ESY) 2023

# What is ESY?

The purpose of ESY services is to assist students that are at risk of significant regression and have difficulty in recoupment of skills in maintaining skills taught during the school year. It is not a means to develop or enhance new skills.

- Significant regression and recoupment consist of the following interrelated elements:
  - (1) the loss of performance levels that were attained before a break in service,
  - (2) the child's limited learning rate, which lengthens the amount of time the child requires to review and/or relearn previously attained objectives, and
  - (3) the fact that the time for that child to accomplish such recoupment is greater than the period of time the school district allows all other children for review and/or relearning.

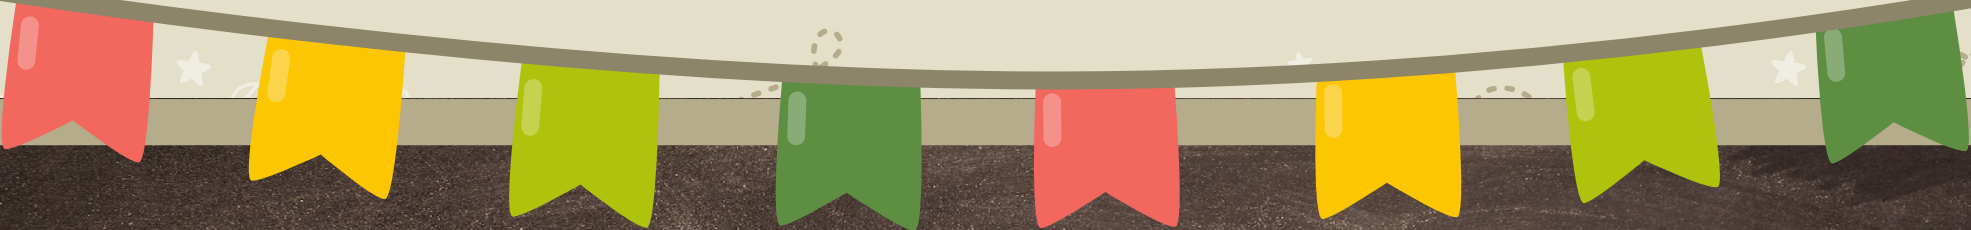

- This school year, Pre/post data collected before and after long weekends and Christmas, Winter, and Spring breaks (and length of time to recoup skill)s will be reviewed at every Team meeting.
- Our summer programming will align with our specialized programming during the school year.
