

Technical Theater

Teacher: Mr. Fahey

What is this course all about??

Do you enjoy being part of a team? How about working hands on, building and creating? Ever wanted to work with lighting, sound or other technical elements? Or maybe just wanted to create and collaborate with others? Then look no further than Technical Theater!

Technical Theater is an introduction to technical creation and implementation for staged productions. Here, students will have the opportunity to work hands on with their peers to design and implement technical aspects of a production. You will learn the ins and outs of our theater and differing theater spaces. Students will also read dramatic text, analyze technical design and create design elements for a production. This course recommends prior theater experience, but it is not required and all are welcome!

What can I expect from Technical Theater?

In Technical Theater, the course will center around hands on training as well as theory in theatrical elements including, but not limited to: Lighting, Sound, Stage Management, Properties, Costumes, Makeup, Safety (IATSE Standards), Publicity, House Management, Rights and Licensing, Design, Supervised Construction, and Show Production. The goal of the course is for students to achieve a level of “student-professionalism,” in which they have the knowledge to assist in most, if not all, of the Hanover District’s theater productions through some capacity of tech (i.e. lights, sound, design, construction, management, etc.).

Scheduling & Credits

Technical Theater is an every-other-day elective course for 2.5 credits. Tech Crew for drama productions work in tandem with the Technical Theater course, although your involvement in crew is not required for the class.

Here are some pictures of sets/lighting from past drama productions!

You're A Good Man, Charlie Brown
Tech Crew

Fall- 2019 (Left)

At The Bottom of Lake Missoula
Spring- 2019 (Right)

Little Shop of Horrors
