

HANOVER SYSTEM-WIDE FACILITIES MASTER PLAN

The conceptual plan below is an example of the graphics Alderman & MacNeish will provide for the Town of Hanover. The additions, represented in cyan, reflect the input received at the three walkthroughs we have attended. Expansion of the core areas, Cafeteria, Gymnasium, and Auditorium, can be achieved with minimal renovation to the existing building. The addition is located in the front of the existing building to give the perception of an entirely new building. Additional classrooms, special needs, Music, Art, and administrative areas, are also incorporated into the conceptual plan. The administrative offices are located at the front of the building with flanking entrance vestibules providing a secure entry into the building.
