

Become an expert on sea creatures

To begin with, some fish like parrotfish poop out white sandy beaches. Did you know that sea turtles hide in seagrass. Additionally sea lion mothers play games with their young to get them into deep waters. Killer whales have huge brains. The female great white is bigger than the male great white. Large numbers of plants grow in the sea. In some places, the plants grow so quickly, some turn green with algae. During storms, seaweed is ripped from rocks to shore and carried out to sea. If it floats, the seaweed becomes homes to young fish and other sea creatures. When Sea Turtles lay eggs, they lay them on the beach where they hatch themselves.

Did you know that female Sea Turtles can lay up to 20 eggs at a time! That's a lot of eggs! Baby sharks are called pups, well then what are baby Sea turtles called? Well they are called hatchlings of course. Narwhals are a species of whale that have a long tooth growing out of its upper lip. This is called a tusk. California Sea lions are becoming endangered. They are so starved, that they are too skinny to move. They must be taken to an animal hospital immediately to be taken care of.
